FINANCE AND TRADE. OFFICE OF THE DAILY APPEAL, MEMPHIS, January 8, 1871. The financial policy of the Secretary of the Treasury and the condition of the department at the commencement of the saw your have coused inquiries from vaons quarters of the country, especially creary kness looked up in the treas y a most extraordinary currency ba Business opened up somewhat brisker to-day, and Front street presented a ance. It appears that on the last day of the year 1839 the coin balance was in ound numbers seventy millions, and more animated appearance than for some days back. The ice above continues to be esterday the currency balance was a drawback to invigation and receipts Yesterday the currency balance was a drawback to navigation and receipts are necessarily light. Prices are much amos eighty multions, there being a difference of sixteen millions in the currency belauce. This large currency balance, the Scoretory finds thinest compelled to maintain. It will be remainfused that since the companion of the new fiscal year, this large more as that for callle, notwithstanding the large increase in number, as reported by the anditors of the principal hog relations to the market for hogs during the past year, the name of the new fiscal year, this large increases in number, as reported by the anditors of the principal hog relations. and of July 1870 which anthorized an log States of the West, on which fact to case of national bank notes, imposed based the reasonable presumption the The Secretary, he eave, the duty of riles for the redemption of an equal recoipts far surpass those of the precedural of their three per cont. curlifully the decrease in the coin and many revenues from the legislation of the preceding year, and bring St. Louis their production of provisions far beyond the proceeding year, and bring St. Louis in the treasury a sum sufficient to enable the department to comply with the law, without resurring to extraordinary mass. This accountation, which the Secretary new Insists is an absolute measure of safety, has not, he adds, aftered unfavorably the financial condition of the country, but on the contrary has been the treasury on a proper basis to most the great reduction in revenue. This reduct in touches along which it is not the great reduction in revenue. This reduct in the customs along, which we extraord in the customs along, which is so or not cannot be demonstrated at the reduction in the real forty millions a year. There is the sumber of hogs in the country has been over estimated. Whether this is so or not cannot be demonstrated at present, her is it very probable. It is more probable that the low prices have been the cause of the short supply in our market more than anything else, and has induced an extent of country curring which did not take place in the preceding year, and bring stangthers, in the preceding year, and the number of animals stangthers, in the preceding year, and the number of animals stangthers, to a marker of the short supply in our market more than anything else, and has induced an extend of the year. In the number of hogs in the country has been decined to prevent a short the number of high preceding year, and the precision of the short supply in our market more than anything else, and has induced an extend of the precision of the prec the large currency balance has been gen-erally explained above in the language of the secretary, but a few figures will make in the secretary, but a few figures will make in the secretary of the \$50,000,000 of authorized additional unit poor circulation, \$30,000, by have been principally shipped to \$1. Louis or Chicago. Whatsoever the came, the deficiency between the two purposes applied for from the New Pages is as surprising accountdensity. on have been applied for from the South
and West, all 00,000 of which will probatis forcest, and stated and \$40,000 000 has already
there is granted and \$40,000 000 has already
there is an arranged to be some instance.

The Secretary of the Treasury has anthodoxid the water of part millions of noin and the part of six millions of bonds during the month.

Let disposition on the part of packers, and in consequence the year closes on somewhat better prices. Whether they will continue depends largely on the increase of supply, which after the holidays, and induced by the improvement of the
